EDUCATION

Vellore Institute of Technology, Bhopal

Bhopal, MP, India

B.Tech in Computer Science and Engineering with Specialization in Gaming Technology

2021 - 2025

TECHNICAL SKILLS AND CERTIFICATION

Frontend Technologies: JavaScript, React.JS, Next.JS, Redux Toolkit, Context API, Bootstrap, TailwindCSS, AceternityUI, HTML, CSS,

Backend Technologies: Node.JS, Express.JS, MongoDB, JsonWebToken, Redis, Socket.io, Rest APIs, Cloudinary, Multer, Supabase, Nodemailer, OpenAI API

Developer Tools: Git, GitHub, Docker, Postman, Visual Studio Code, Cursor, Antigravity, Netlify, Render, Vercel

Certifications: HTML, CSS, and JavaScript for Web Developers, Coursera; The Complete 2023 Web Development Bootcamp, Udemy

EXPERIENCE

Tata Consultancy Services

Systems Engineer

July 2025 - Present

- Developed and maintained responsive web applications using **React.js**, ensuring high performance and seamless user experience.
- Integrated RESTful APIs using **Axios** and handled state management efficiently to ensure smooth data flow across components.
- Optimized application performance through code splitting, memoization, and efficient rendering techniques.
- Collaborated with backend teams and participated in debugging, issue resolution, and deployment in production environments.

Forus Electric

Full Stack Developer Intern

May 2025 - July 2025

- Technologies:** React.js, Node.js, Express.js, MongoDB, Redis, REST APIs
- Developed an internal **web application** to calculate **logistics costs** across multiple **service providers**.
- Implemented **secure authentication** and **authorization** using **JWT**, **middleware-based API security**, and **role-based access control (RBAC)**; integrated **Nodemailer** for **automated email notifications** and **OTP verification**.
- Optimized **application performance** by implementing **Redis caching**, reducing **API response time** by up to **94%**; designed and implemented **pricing algorithms**, built a **bidding module**, and integrated multiple **third-party APIs**.

PROJECTS

TaskFlow - Real-Time Collaboration Task Management SaaS Platform — Full Stack Developer(Solo Project) Jan 2026

- Tech:** React.js, TailwindCSS, Node.js, Express.js, MongoDB, Redis, WebSockets (Socket.IO), JWT, Docker.
- Built a **multi-tenant SaaS task management system** with organizations, boards, columns, and tasks, implementing **role-based access control (Owner, Manager, Member)** and **real-time Kanban boards** with instant UI synchronization via **board-level WebSocket rooms**.
- Designed a **REST-first backend architecture** for task creation, assignment, and movement, integrating **WebSockets** to broadcast real-time updates and ensure consistent state across all connected users.
- Enhanced performance using **Redis caching**, reducing average API response time from **360 ms to 42 ms**, and **containerized the application with Docker Compose**; **Links:** [GitHub Backend](#) | [GitHub Frontend](#) | [Live Demo](#).

Nexus - Social Media Web App — Full Stack Developer(Solo Project)

Nov 2024

- Developed a **full-stack social media web application** using the **MERN stack**, featuring post creation with image uploads, likes, comments, and **real-time user chat**.
- Implemented **secure authentication and authorization** using **JSON Web Tokens (JWT)**, enabling user login, profile updates, password changes, and account management.
- Integrated **Multer** for efficient image upload handling and built complete **CRUD functionality** for posts and user profile.
- Tech:** MongoDB, Express.js, React.js, Node.js, JWT, Multer, Postman; **Deployment:** Netlify (Frontend), Render (Backend); **Links:** [GitHub](#) | [Live Demo](#).

ACHIEVEMENTS

Achievements

- Postman API Expert:** Achieved Postman API Fundamentals Student Expert certification.
- Research Publication:** Published a research paper on "Skin Cancer Detection Using Deep Learning Models" in the ICICCT, JNU Delhi conference in June, 2024.
